

Turn AI, strategy, and customer growth into lifetime value that compounds.

Independent executive advisory on the operating models, platforms, and decisions that compound lifetime value.

OUTCOMES

- **AI that performs**
Investment tied to measurable revenue and margin, not demos.
- **Churn down, lifetime value up**
Isolate the drivers; own and measure the interventions.
- **Customer revenue growth**
Pricing, friction removal, and service-failure recovery.
- **Decisions your board can act on**
Operating models and clear one to three year roadmaps.

EXPERTISE

Most firms split these across three people. **One operator has run all three at enterprise scale:** customer growth, AI, and strategy.
